Customize Your Seawolf Ring:

1. **Ring Top:** HA(L)-3 SEAWOLF. **Cannot be changed or altered.**

2. **Ring Size:** (This is very important, Please have your finger sized by a reputable jewelry store using a WIDE BAND ring sizer). Keep in mind that If your ring does not fit, Justin’s will resize for free, but please make every effort to get the correct ring size to them.

3. **Metal:** Read the information below and indicate your metal choice here: . The prices listed below for each metal type are for the metal price only. It does not include special engraving or stones etc.

Lustrium:	\$202.00	10 kt White Gold	\$778.00
Questra:	\$285.00	10 kt yellow Gold	\$778.00
Silver Elite:.....	\$???.00	14 kt White Gold	\$1,163.80
Solaris Elite:.....	\$.00	14 kt yellow Gold	\$1,163.80
		18 kt White Gold	\$1,853.80
		18 kt yellow Gold	\$1,853.80

NOTE FROM CRAIG JONES:

I do not recommend the Solaris Elite or the Silver Elite. They are, in my opinion, greatly overpriced considering the metal content. The Jostens rep sent Cheryl and I a sample Questra ring so that we could see what it looked like. We really think it is a nice ring for the price, but so is Lustrium. Just mentioning this in case you prefer a gold color ring over a silver one, and do not want to spend the money for a 10, 14 or 18 kt gold ring. It looks like 18kt gold to me and the process they use to fuse the 23 kt gold into the Lustrium metal is much much better than plating since it is infused. Remember, Lustrium is a non-precious metal alloy that is silver in color but will look like 18 kt gold when fused with the gold. If you look at the gold colored Air Warfare ring picture above, the Questar is a little darker gold. Questar is \$83 more than Lustrium. Not trying to sway anyone toward a more expensive ring, just providing input to help you make a decision.

METAL INFORMATION/CHOICES:

NOTE: Nickel is included in Lustrium® and all white gold.

- **Lustrium®** - A non-precious metal alloy that is silver in color. It is a hard and durable metal. Lustrium will react to oxygen and thus may require additional care and [cleaning](#).
- **Questa** - Same characteristics as Lustrium, but yellow in color because of coating with 23 karat yellow gold. According to my conversation with the Jostens representative, the gold is more fused into the Lustrium rather than the standard plating process, so it should be more durable.
- **Solaris Elite™** - This radiant yellow 6K metal alloy is beautiful and affordable. We've combined durability and affordability to create our exclusive yellow 6K alloy.
- **Silver Elite®** - A precious metal alloy primarily composed of silver with elements of palladium and gold, coated with a rhodium plating.
Rhodium Plating - A member of the Platinum metals group. Rhodium is a silvery, metallic colored precious metal. It is an extremely hard material and is highly resistant to corrosion and it is used extensively in the fine jewelry industry. Rhodium provides protection for Silver Elite®, coating it to help prevent tarnish and scratches. It is very durable and prevents skin oil from dulling the ring. Rhodium is most commonly plated on white gold and sterling silver jewelry.

- **Gold** - Jostens offers gold in 2 colors and 3 karat qualities:

Yellow Gold - Because of its durability and lasting value over time, gold is a wise investment. Gold has been the standard for jewelry for over 4000 years.

White Gold - Has the same lasting qualities and value as yellow gold, but is composed of a different metal.

Metal Purities

18K - 75% pure gold, 25% metal alloy.

14K - 58.5% pure gold, 41.5% metal alloy.

6. Check Desired Stone: All stones are available in a smooth or faceted stone cut except Black Onyx. Black Onyx is only offered as a smooth stone.

For information on stone faceting (polished surfaces of a finished gemstone), please contact the Jostens Representative for clarification. Other stones are available including diamonds and cubic zirconias. Type Stone Name here from list below:

7. Exterior (side panel) Engraving. (5 characters per available panel [includes dashes and spaces etc.])
 Example: DET-6; 69/70; AO2; AOCS; ADJC; PC3; "KID";

Side 1:

Side 2:

8. Inside Engraving.

Initials are free up to 3 characters. Full name engraving is an additional \$15. Only 18 characters allowed including spaces and periods etc. You are **not** restricted to engraving your name. If you want something like **"Seawolf Forever"**, that will work. You can have them engrave almost anything you want, as long as it meets the criteria for spacing (18 characters). I recommend your name.

Select either option A or Option B (*Optional. Discuss with Jostens rep):

(A) **Script*

please print requested inside engraving above

(B) Personal Initials (Standard)

If engraving initials only, please enter your initial above

9. Calculate Price:

10. For an extra fee, you may have the number 44 encrusted into the stone as long as the stone you have chosen is smooth, not faceted. There is an additional fee for this, but at this time I am unsure of the amount. Please contact the Jostens rep. for pricing. I believe it is around \$15, but I am not sure.
